

LISTING OF CLAIMS

This listing of claims will replace all prior versions in the instant application:

Claims 1 - 13 (Cancelled)

14. (Currently Amended) A fabric article treating device system said treating device system comprising:

- a) ~~one or more sources of a benefit composition~~ a fabric article drying appliance; and
- b) ~~a dispensing means comprising one or more temperature sensitive components wherein at least one of said temperature sensitive components is located inside of a fabric article drying appliance~~ a discrete stand-alone fabric article treating device comprised of a single unit located inside of said fabric article drying appliance wherein said discrete stand-alone fabric article treating device dispenses a benefit composition into said fabric article drying appliance wherein said discrete stand-alone fabric article treating device is independent of said fabric article drying appliance controls and wherein said fabric article treating device includes a power source which is thermally protected wherein said thermal protection of said power source comprises a first, second, and third layer, wherein said first layer is adjacent to said second layer and said second layer is adjacent to said third layer and wherein said first layer and said third layer are positioned in exterior relation to said second layer and wherein said second layer has a thermal conductivity from about 0 to about 5 W/m²°C at 25°C.
- e) ~~one or more means for thermal protection of said one or more temperature sensitive components located inside of said fabric article drying appliance wherein the means for thermal protection of said one or more temperature sensitive components comprises a first, second, and third layer, wherein said first layer is adjacent to said second layer and said second layer is adjacent to said third layer and wherein said first layer and said third layer are positioned in exterior relation to said second layer and wherein said second layer has a thermal conductivity from about 0 to about 5 W/m²°C at 25°C.~~

15. (Original) The device according to Claim 14 wherein said second layer comprises a gas, a solid, a liquid, or a combination thereof.

Claims 16 - 23 (Cancelled)
